Vital for Both Women and Men

The whole-food calcium in New Chapter's Bone Strength Take Care® is easily recognized and absorbed by our bodies because it's plant-based. But the calcium in most conventional supplements comes from limestone – rocks. The body simply doesn't recognize or absorb it in the same way. **Is Calcium enough?** Not even close. The body also needs sufficient levels of Vitamin K, Vitamin D and trace minerals in order for calcium to be utilized by the body to build healthy bones. Without sufficient natural Vitamin K2, calcium ends up in your arteries and soft tissues. And without sufficient Vitamin D, the body absorbs only a fraction of the calcium it normally would.
